## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-24 are rejected under 35 U.S.C. 102(e) as being anticipated by McClure et al. (US 6,250,548) (hereinafter referred to as 'McClure').

McClure teaches an electronic voting system comprising a voting tablet 56 having a display 100 for displaying ballot information in one of a plurality of different languages and a number identified as the number of voters that have voted on the voting tablet 56 and a keyboard 106 for write-in vote entry and editing (col. 19, lines 29-36). The tablet 56 may alternatively include a touch screen (col. 18, lines 5-8). A bar code scanner 88 is used to scan a voter registration log which has an associated bar code designation for each voter to indicate the

voter's eligibility (col. 15, lines 35-41). The voter's vote is cast and stored in a permanent memory in the voting tablet 56 (col. 43, lines 17-20). The voting tablet 56 has a designed-in capability to perform pre-election tests to verify all information prior to opening the polls (col. 42, lines 18-21). A precinct printer prints the sum of tabulated votes. An interface is used to connect a tablet network controller 50 to a tablet 56. Other identical tablets 56 may be daisy-chained to the tablet 56 connected to the TNC 50 (col. 17, lines 46-49). The tablet 56 may be folded into a protective transportation and storage configuration. When deployed at a precinct 48, the voting tablet 56 is unlocked and opened (col. 17, lines 19-37). Each tablet 56 has an etched aluminum nameplate secured to the exterior of its enclosure. The nameplate has a unique bar code etched into it that uniquely identifies the tablet 56 (col. 40, lines 60-64).
